The importance of being scentsensitive.

PROMOTING A SCENT AND ODOUR-FREE CAMPUS

Did you know there are people on campus who have an environmental allergy or a sensitivity to scents and odours? Some items such as scented hygiene products, lotions, cologne, perfumes, or even food can cause health risks for students, employees, and visitors.

Langara is committed to providing a safe campus for everyone. Please learn more about our guidelines for a scent and odour-free environment because when everyone is healthy, we can all do our best work.
