Ministry Funded FTE	7,046.0			

LANGARA COLLEGE

Notes to FTE Enrolment Report

Years ended March 31, 2010 and 2009

1. Basis of FTE calculation

FTE enrolment is calculated based on instructions contained in the Student FTE Enrolment Reporting Manual provided by the Ministry of Advanced Education and Labour Market Development of the Province of British Columbia.

The method for calculating FTE enrolment is based on course credits, or, where credits are not available, student contact hours. Student course registrations are first assigned to programs and FTE's are then calculated based on program divisors. These divisors are based on expected course loads for full time students as formally prescribed by the College.

2. Report presentation

In accordance with Ministry requirements to include all instructional activities, this report includes enrolments for international students. These enrolments are shown separately as they are not funded by the Province of British Columbia.
